CLEVELAND WHEEL & BRAKE SYSTEMS EXPANDS DISTRIBUTION NETWORK

CWBS Adds Direct Distributors to Sales Network

Avon, Ohio (December 15, 2025) – Cleveland Wheel & Brake Systems a global provider of aircraft wheels, brakes, and hydraulic components to the general aviation, business jet, rotorcraft, and military markets, today announced they have extended their distribution channel by adding new distributors of their products. Cleveland now offers its products through two Preferred Distributors: Airpart Supply Ltd. and Boeing Distribution, Inc. (BDI). It also added two Authorized Distributors: CJ Aerospace Pty. Ltd. and Southern Cross Aviation, LLC.

The distributors above will sell Cleveland’s lines of aircraft wheel & brake assemblies, hydraulics products, general aviation wheel and brake conversion kits directly to recreational pilots, aircraft mechanics, flight schools, and FBO customers.

"The expansion of Cleveland’s distributor network will give aircraft customers more options for purchasing our OEM quality equipment provide faster access to our products, and increase local technical support, allowing us to grow our business globally," said Brett Fulford, President of Cleveland Wheels and Brake Systems. "Each of these distributors brings deep expertise in their respective markets, along with a strong commitment to technical service and customer support. Together, we are elevating what is possible for our clients who depend on reliable, high-performance products."

The new distribution agreements take effect immediately, with full product availability expected across all regions. For more information about Cleveland Wheel & Brake Systems and their products, go to clevelandwheelandbrake.com.

About Cleveland Wheel & Brake Systems

Founded in 1936, Cleveland Wheel & Brake Systems is a maker of aircraft wheel and brake assemblies as well as hydraulic components for aircraft landing gear.
